Storage: Bringing a design sensibility to flexibility.

Precision's range of storage systems provide a comprehensive solution for today's commercial filing needs. From personal, to shared, to archival storage, Precision has a solution to meet any requirement.

The choice of doors is wide open

Offering complete flexibility for ever changing work places. Cabinets can be easily converted to a different door type should your requirements change.

Sliding door

Tambour door

No door (bookcase)

Strata 2 Sliding Door

The Strata 2 Sliding Door Cabinet is the latest sleek addition to the Precision by Dexion Cabinet range. Designed with office refurbishments and fit outs in mind, this cabinet is effortlessly incorporated into workstation areas or smaller office areas where space optimisation is essential.

The cabinet's sliding doors are perfectly suited to aisles because they do not impede walkways. They are uniquely designed to ensure a smooth, quiet sliding door operation, while the bevelled handle is ergonomic and easy to use. The Strata 2 Sliding Door Cabinet is GECA Certified and has perforated doors with acoustic sound absorption panels as standard. The perforated design creates a modern aesthetic, whilst acoustic panels enhance sound absorption.

Features

- Ergonomic bevelled handle which is easy to use
- Achieve maximum storage capacity across a range of cabinet sizes incorporating fully adjustable shelves
- Secure 3000 locking system including master key availability provides ultimate peace of mind
- Levelling feet as standard and adjustable from the base inside the unit
- Wide variety of accessories available and interchangeable across Precision by Dexion products
- Complimentary matching planter box range
- Removable barrel folding key with antimicrobial properties for durability, pocket comfort and hygiene
- Acoustic sound absorption panel as standard

- Shelf – slim
- Divider – slotted shelf
- Divider – plastic
- Divider – wire
- Roll out – file frame
- Roll out – media drawer
- Roll out – reference shelf
- Roll out – deep drawer
- Multi drawers
- Coat rail

Strata 2 Tambour Door

The Strata 2 Tambour Cabinet perfectly blends generous storage capacity with a modern design aesthetic. Of the many key features, perhaps the most striking is the clever articulated curtain design that allows quick, easy accessibility while ensuring open doors do not impede on floor space in front of the cabinet.

The diverse range of sizes are flexible enough to accommodate all modern office environments, while the smaller sizes have been specifically designed to align with common workstation screen heights to maintain an open plan ambience.

Features

- Achieve maximum storage capacity across a range of cabinet sizes incorporating fully adjustable shelves
- Environmentally sustainable ABS door slats as standard, now also available in a translucent finish
- Secure Pincer locking system provides ultimate peace of mind with one key operating two lock latches with separate anchor points in the door.
- Secure 3000 series locking system including master key availability
- Levelling feet as standard and adjustable from the base inside the unit
- Optional lockable heavy duty castors (height restrictions may apply)
- Magnetic strips to door posts eliminate door gaps
- Complimentary matching planter box range
- Removable barrel folding key with antimicrobial properties for durability, pocket comfort and hygiene
- GECA certification
- Made from 100% recyclable sheet steel under ISO14001 EMS certification
- Durable powder coat finish

Strata 2 Swing Door

Imagine a dual purpose storage solution designed to accommodate your changing storage requirements. The Strata 2 Swing Door Cabinet offers the ultimate combination in functionality and value. Through a diverse range of heights and with matching depths to the balance of the Precision by Dexion Strata 2 range, this cabinet compliments the entire cabinet range perfectly.

The Strata 2 Swing Door Cabinet is equipped with reinforced door panels, concealed hinges and an enclosed door frame design for added strength and security. Features include a full height recessed handle providing a functional grip, whilst maintaining a modern, simple aesthetic.

Flexibility is assured as the Swing Door Cabinet can be easily converted to a Tambour Door or Bookcase Cabinet.

Features

- Achieve maximum storage capacity across a range of cabinet sizes incorporating fully adjustable shelves
- Durable powder coat finish
- Made from 100% recyclable sheet steel under ISO14001 EMS certification
- Levelling feet as standard and adjustable from the base inside the unit
- Optional lockable heavy duty castors (height restrictions may apply)
- Full height recessed ergonomic handles for ease of operation
- Secure 3000 series locking system. Removable barrel folding key with antimicrobial properties for durability, pocket comfort and hygiene
- GECA Certification
- Complimentary matching planter box range
- Integrated multipoint locking for exceptional security

Grow your space.

A range of premium planter boxes designed specifically to top our Strata 2 cabinets. Whether they're Bookcase cabinets, or Tambour, Swing or Sliding Door cabinets, or Precision Lateral Drawer cabinets. However you integrate them, the planters and cabinets will align perfectly to present clean, consistent lines.

Strata 2 Planters

The planter boxes are provided complete with moulded ABS liners that provide both strong support and moisture protection. The Strata 2 Planters are designed to accept 200mm (8") pots as standard, with a maximum aperture of 230mm (9").

Strata 2 Planters are available with both plain and perforated fronts. Perforated planters come complete with sound absorbing acoustic panels as standard.

The planters consist of 3 nested components: a powdercoated steel tray with adjustable pot openings, waterproof ABS liner and powdercoated steel carcass.

Features

- Planters are provided as a complete assembled unit
- Pre-fitted clear rubber feet are secured to the underside of the planter box. Feet assist in holding the planter in position whilst on the cabinet and prevent any scuffing of the cabinet top
- Plain or perforated designs available
- Sound absorbing acoustic panels fitted as standard to perforated planter design
- Environmentally sustainable waterproof ABS full depth safety liner as standard
- Unique top tray with folding tabs to assist in retaining fill. Can also be inverted for use without any fill
- GECA certified

Firstline Mobile Pedestal

This Mobile Pedestal has the popular 'flush front' design – with the side pull, doing away with the need to have more traditional, protruding handles. The full extension runners on the unit's drawers, allow you to access all of the usable filing space with ease.

Features

- Anti-tilt fifth wheel fitted for safety
- Fitted with nylon reinforced twin wheel castors
- All steel construction
- Durable oven baked powder-coat finish
- Pencil tray included
- Secure locking system provides peace-of-mind that items stored will be kept safe
- Full drawer extension provides easy access to all files
- 3 year warranty
- Standard and Slimline models available

Powder-coated steel in White Satin.

Caddy

The Caddy has a sturdy construction and heavy duty castors and is a great multi-function unit. This mobile unit is suitable for filing and storing your documents, stationery and personal items. Combines benefit of both a Pedestal and a Tambour in one unit.

Features

- Designated filing and storage sections, drawers for files, stationery, personal items while books and CD's can be stored on shelves
- Smooth heavy duty telescopic ball bearing runner system allows them to fully extend outside the cabinet body, providing easy access and quiet operation
- 20kg load carrying capacity for file drawer
- An all welded construction providing strength and rigidity plus durable oven baked powder-coat finish with corrosion resistant metal treatment
- Full height box drawers provide utmost protection and maximise the space available for file storage as well as for alternative storage use
- Designed specifically to fit under desks or workstations plus intelligent side pull/flush front drawer design offers a desirable 'minimalist' look
- Secure Series 2000 locking system, provides peace-of-mind that items stored will be kept safe
- Suitable for a multitude of low security storage applications
- Choice of open storage or Tambour door to conceal shelving space
- Hard nylon twin wheel lockable castors with polyurethane soft wheels ideal for hard floors
- 10 year warranty

Powder-coated steel in White Satin.

Tough, adaptable and secure.

A wide range of flexibility to meet the growing demand for locker solutions within today's workplaces.

Dexion recognises the importance of a functional and ergonomic locker which supports the way your business operates and that is why our lockers have been designed with adaptability in mind and can be configured to meet your specific needs.

Lockers – Classic

The Classic locker features an all steel construction with a fully powder coated scratch resistant finish. There are five standard door options and two standard widths available. They feature ventilation slots and sloping tops are available. Doors are fully lockable with three locking systems available: cam locks, latch locks and flush locks. Three point locking is fitted as standard on the single tier locker.

Features

- Uniform look when banked together
- Perforations provide ventilation
- Shelves, coat hooks, coat rails and reinforced doors available for all sizes
- Optional sloping tops and benches available
- Doors with 180 degree opening angle
- 2000 lock combinations available
- All doors have card holders
- 10 year warranty

Powder-coated steel in Silver Grey or White Satin.

Laptop Lockers

Precision Laptop Locker provides a secure classroom storage facility for students laptops, notebooks, and tablets. These lockers are designed for ease of access and provide the ability to charge the device whilst in the storage unit. The single door unit is ideal for use with younger children, allowing the teacher control of the locker, whilst the multi door unit caters for the older, independent student.

Features

- Safe, secure, scratch resistant powder coated steel construction
- Concealed hinges for additional security
- Riveted steel shelves
- Fully lockable
- Multi door units are fitted with camlocks (master key available)
- Single door units are fitted with a flushlock handle plus top and bottom lock bars to provide a 3 point locking system
- Latch locks and digital locks are also available for the multi door units (master code also available)
- Can be banked in multiple units
- Charger cable holes and ventilation slots are standard in the back panel of each compartment
- Charger cable hole is fitted with a rubber grommet (15mm diameter opening) to protect cable from damage
- Available in two heights
- Finishing dress panels to conceal fixings
- Removable shelf mounted cable clips for charger cord (optional)

Activity-Based Workplace Lockers

Precision's Activity-Based Workplace (ABW) lockers are designed to meet the needs of modern offices with shared desking layouts. The lockers provide staff with secure storage compartments to safely store personal belongings when they are both in and out of the office. The generous compartment size allows for the storage of computer equipment and office files. Locker doors can be numbered or personalised with graphics in line with corporate branding. Concealed fixings and hinges provide a contemporary look.

Features

- 2,3 or 4 tier options. Flexible design, suitable for any wall length
- CKD (complete knock down) disassembly design makes relocation and recycling easier, and reduces freight cost
- Removable stationery drawer, allows staff to easily transport office equipment from their locker to their designated workstation
- Retrofittable, extensions can be added at any time
- Lockers can be easily configured to suit a range of software systems, such as Smart Card operation
- Lockable with a 2000 key combination, or available with the option of hard-wired, 3G or freestanding battery operated locks
- Spacious internal locker dimension allows for storing lever arch folders
- Finishing panels can be fitted to ensure clean ends
- Mail delivery slot included in every door
- Optional graphic numbering or name card holders
- Customisable ventilation slot pattern
- Lost keys or abandoned lockers can easily be managed using a 'lock barrel exchange system'
- All 100% steel construction with scratch resistant powder coated finish

Maxi Lockers

Precision Maxi Locker has increased capacity allowing for larger items to be stored, such as boots, uniforms, hats and personal protection equipment. The locker can be customised with accessories to completely personalise the locker to suit your storage needs. Standard Maxi Locker options include Single door, 2 door and 4 door variants.

Features

- All steel construction with a fully powder coated scratch resistant finish
- Reinforced doors provide additional strength
- Lockers can be configured to suit any storage requirements, and include: hat shelves, boot shelves, coat rails and hooks, equipment holders, towel rails and name plates
- Fully lockable with optional mutli-point
- Ventilation holes in all doors as standard
- 100% recyclable
- 10 year warranty
- Custom variants available on application
- New Zealand made

Everything in it's place.

From warehouse to offices, hospitals to libraries and museums to retail outlets, Dexion has the most complete and adjustable shelving range available.

Smart, functional
and versatile.

The flexibility of our systems ensures they are able to grow as your business grows. Most of our shelving systems can be mounted on Compactus® mobile bases and runners for a high density storage solution.

Ultima CI-80

Perfect for the growing business because it employs a modular system, Ultima CI-80 expands in any direction and is suitable for small parts of light to medium weight.

A common frame panel makes sideways extension simple while units are made mobile with Compactus® bases and runners. A wide range of accessories allow you to switch between front office and backroom applications.

Features

- Modular design allows systems to be easily added to or reconfigured at any time
- With a complete range of accessories the applications for this product are unlimited
- Ultima CI-80 can even be mounted on Compactus mobile bases and runners
- Carries significantly greater loads than comparable systems
- Available in a wide variety of sizes to allow system tailoring
- Add finishing panels, rear covers and top extrusions to achieve a clean smart finish

Compactus Side2Side

Side2Side is the ideal system for transforming under-utilised areas such as alcoves into efficient storage space. It's simple; we just place a row of mobile shelving in front of a row of static shelving. This eliminates the need for permanent aisles as items stored are accessed from the front.

More accessible bays provide multiple 'picking faces', giving faster access for more operators to more stored items. Easily add to your Side2Side system should the need arise

Features

- Create an extremely efficient use of unconventional storage areas by mounting Ultima CI-80 shelving onto the attractive Side2Side track and runner system
- More accessible bays provide multiple 'picking faces', giving faster access for more operators to more stored items
- The innovative low profile track design provides great strength and enhanced mobility for the side to side base runners
- Attractive clip on track ramps further reduce trip hazards when accessing rear bays. The pivoting ramps allow a seamless transition between the flooring material and track
- The unique track based anti-tilt mechanism secures all shelving, further enhancing operator safety
- Easily upgrade from Dexion Ultima CI-80 shelving system

Compactus Freetrack

Freetrack is the ideal light-weight Compactus system for just about any storage and filing application. The lighter weight of the system reduces the chance of operator strain and loads imposed on the floor. But just because Freetrack is lighter than other systems this doesn't mean it isn't built tough. Move block-loads up to 1000 kg effortlessly with Freetrack Compactus. Freetrack systems are easier and far more cost effective to install, relocate or reconfigure than standard fixed-track systems.

Easily up-grade from Ultima static shelving systems to any of the three Freetrack Compactus systems.

Features

- Robust aluminium anodised components provides strength and a streamline finish that constitutes to a modern attractive appearance
- Low profile track incorporates pivoting ramps that follow the floor contour to reduce trip hazards and provide trolley and wheelchair access
- Universal designed runner allows various double-sided bay combinations
- Crinolin steel strips provide hard wearing runner surface for smooth operating
- Design the perfect solution with unlimited base lengths
- A lighter weight system reduces operator strain and loads imposed on the floor
- Tracks do not require fixing eliminating any damage to floor coverings
- Track and runner combinations add only 65mm to the overall shelving height

Compactus Mekdrive

Mekdrive revolutionises filing and storage systems with advanced technology and design. It is the lightest mechanically assisted mobile storage system available; this keeps floor loads to a minimum, a major consideration in most high rise buildings.

And best of all, its unique belt-drive technology and ergonomically designed hand-wheel moves 4000kg block loads effortlessly, removing operator strain.

Mekdrive provides incredible value when compared with traditional mechanically operated fixed-track systems. Mekdrive does not require floor fixing or timber infills, eliminating the possibility of damage to floor coverings. You can easily upgrade to a Mekdrive from a Freetrack system.

Features

- Create an extremely efficient high density filing and storage system by mounting Ultima CI-80 shelving onto the attractive Mekdrive track and runner system
- The innovative low profile track design provides great strength and enhanced mobility for the Mekdrive runners
- Attractive clip-on track ramps further reduce trips hazards and allow for the movement of trolleys or wheelchairs between shelving bays
- Multiple track configurations apply better distribution of floor loads
- Mekdrive needs no fixing into the floor. This eliminates any permanent damage to floors and flooring material, plus allows for cost effective relocation or reconfiguration of the systems as needs arise
- The unique track based anti-tilt mechanism secures all shelving, further enhancing operator safety and the hand wheel reduces risk of hand or arm injury
- Easily add to your Mekdrive system should the need arise
- A choice of locking options provides added security

Library shelving solutions.

Imagine a high quality shelving solution that has virtually endless possibilities when storing, displaying and filing resource and reference material

Precision Library Shelving

Precision Library Shelving is ideal for academic, corporate, public and legal libraries, as well as general office applications. It has been designed to adapt to both stationary and mobile storage applications. With an extensive range of accessories available, you can be sure to find the perfect solution for a wide variety of media formats and specific storage needs. Available in a wide range of heights, widths and depths, our library shelving system makes full and efficient use of available space.

Features

- An extensive range of accessories are available to solve a diverse array of library display and storage requirements
- The modular design of the system facilitates easy expansion and/or reconfiguration
- Clip-together construction makes installation and relocation quick and easy
- Steel construction for complete strength, stability and rigidity
- Powder coat finish for durability
- Shelf carrying capacity tested and rated to AS2273-1979 provides peace-of-mind
- End-panels define library sections and can be used to accept indexing
- Timber dress panels can be fitted for custom fitouts
- Slotted posts and wall-channel allow easy adjustment at 25.4mm increments
- Optional overhead braces can be fitted to provide anti-tip security
- 10 Year Warranty – conditions apply

Dexion Safety Rails

The Dexion Safety Rail is designed specifically for protecting the contents of shelves from spilling in the event of a seismic event or during rigorous mobile shelving operation. The Safety Rail fits to the shelf without the use of tools and can be fitted to a wide range of shelf sizes. The Safety Rail maintains full clear entry to the shelf contents, for the full length of the shelf when opened.

Features

- The Safety Rail is designed for use in seismic risk zones to reduce the risk of items falling from shelves in the event of a significant earthquake
- When fitted to Mobile Compactus shelving the safety rail works to prevent valuable items falling off shelves during the opening or closing of the unit
- Custom rail configurations are available for specific applications such as small items, higher loads, and unique items
- Bars are produced from zinc-plated 6mm mild steel bar with a durable powder coated finish
- Colours available are: Flame Red
- High strength Lexan Polycarbonate retainers are backed with 3M VHB tape
- Available in many different widths

Precision Retail Shelving

Precision Retail Shelving is a cantilever, post based system designed to safely locate and display all manner of saleable goods. Available in a wide range of heights, widths and depths the system allows for the maximisation of shelf/display space within your restraints, whilst modularity enables easy reconfiguration or addition. Units can be wall mounted or freestanding.

An extensive range of standard accessories are available to cater for various display and storage requirements.

Features

The Precision Retail Shelving system comes with a number of design enhancements that provide superior performance and functionality.

- Clip-on panels provide clean lines, add lateral rigidity and eliminate the need for shelf spacers
- Clip-on panels are available in plain and perforated finish, the latter allowing for the mounting of various accessories to display hang sell products
- A moulded tube cap replaces the folded steel plate providing a cleaner finish
- The 80mm post and cross rail/base depth provides significantly more system strength and rigidity
- Optional diagonal cross braces between posts provide even more lateral strength to shelving units; especially during unpredicted seismic activity
- Increased folded leg and baseplate thickness provide greater overall capacity and safety
- Quicker installation with easy to install horizontal post to post centre braces
- Centre braces incorporate easy action lugs that lock the braces to the post, ensuring they will stay in place under normal operation
