- Project Name: Headquarters for Telecom New Zealand
- Architecture: Architectus
- Interior Design: Warren & Mahoney; Geyer
- Furniture Supplier: Precision for lockers, planters & mobile storage

Project Statistics:

Completed 2010

Project Description

For Telecom New Zealand’s new headquarters in Auckland Precision was selected to provide their innovative storage and furniture solutions. Along with mobile storage and planters, Precision designed and supplied customised staff lockers to complement the new dynamic & vibrant environment.

Case Study | Telecom Auckland

Project Description continued...

Telecom's goal was to create a dynamic, technology forward environment within a sustainable framework. "The building design and technology actively encourage staff to move around," (Warren & Mahoney senior associate Dominic Plume).

Precision's recyclable steel planters were one of the sustainable components of the integrated interior scheme. Increasingly the benefits of adding green plants to a workplace are being recognised. Along with decreasing noise levels, the presence of indoor plants in the office is not only aesthetically pleasing, but also helps to increase worker productivity, reduce stress, and improve air quality.
